Use Camellias for Table
Decoration

Thank You Folks,

For your many orders this past season. We have the best stock of Camellias to offer this year we have ever had. We have 350 varieties. Visit our nursery and see them in bloom. You are always welcome.

CAMELLIAS ARE EASY TO GROW — DON'T PLANT THEM TOO DEEP

Spray them first part of April with Volck one to fifty for scale. Give them another spray the latter part of the summer. Be sure this is done before cold weather.

Leave Burlap Bag on Camellias When Planting. Never pick them up by the stem — always by the ball of soil.

TERMS — We guarantee our stock to be true to name and properly packed. Our responsibility for delivery ceases when we have delivered the stock in good condition to the transportation company or carrier. Any claims should be made to them, on receipt of stock.

ALL ORDERS CASH: Add sales tax if your state demands sales tax.

TRANSPORTATION: How do you want your order shipped — Parcel Post, Motor Express, Railway Express or Freight.

We close Sundays. Visitors always welcome.

AZALEA INDICA

This is the large flowering variety of the Azalea family. They will grow in shade or full sun. Many use them as pot or tub plants. Azaleas want acid soil and where they are planted in a limestone soil, one should use an azalea fertilizer. In planting, use an abundance of leaf-mold or peat-moss. Where they are planted in sand, a large hole should be dug, and be refilled with a mixture of leaf-mold, peat-moss and any heavy type of soil. We add cow manure to our planting soil, have for 25 years and find that we get good strong, sturdy plants. In the Spring we fertilize with Vigoro. Azaleas make better looking plants if sheared just as soon as they are through blooming.

Spray with Volck, one to fifty, for scalea and red spider.
